AVERAGE		48.4	49.1	15.384	#DIV/0!

At least 3 scores are needed to display a course handicap.

A GHIN Handicap Index is shown in yellow if it is lower than a league HI.

The league saves every one of your scores and uses a USGA formula to calculate a 2026 Handicap Index. The Course Ratings and Slope Ratings for Twin Woods are used in that formula. Your Handicap Index then is used to calculate your Course Handicap, using a similar USGA formula.

Your Course Handicap is used to determine your Net Score for our various competitions.

Net Score Is The Actual Score Minus The Course Handicap.

Handicaps are revised each week and are used to calculate the following week's net scores.

If you have purchased USGA's GHIN handicap calculator, let us know what your GHIN Handicap Index is. The USGA's handicap calculator uses your golf scores from other courses and converts all of your scores into an 18-hole Handicap Index. The Senior Golf League will divide your 18-hole GHIN Handicap Index by 2 and use it as your Handicap Index if it is lower than your 2026 league Handicap Index.
